Personal Summary

A hard-working, motivated & determined web developer, specializing in front end technologies. With experience working in teams and solo, to achieve goals & deliver functionality within set deadlines. Able to deliver effectively & efficiently under pressure.

Experience

FRONT END DEVELOPER | CHEIL | AUGUST 2016 – Present

➢ Development & maintenance of the Samsung UK & IE website, using:
- o HTML
- o CSS & SCSS
- o JS (& jQuery)
- o Handlebars
- o Gulp

➢ Creation & maintenance of page templates using AEM
➢ Interaction with clients to gain requirements/feedback on website builds
➢ Worked on pages that gained 100s of 1000s of monthly traffic

FRONT END DEVELOPER | CUESONGS | FEBRUARY 2015 – MAY 2016

➢ Design & development of an e-commerce website, using:
- o HTML & CSS (+ SCSS)
- o jQuery (+ JS)
- o Handlebars
- o Gulp for building distributables (bundling / optimization)

➢ Creation of responsive HTML email templates for use with the core platform
➢ Partial usage of PHP (Blade) for bug fixing of API and feature development
➢ Management of the blog platform, which included:
- o Designing layouts and implementing articles written by the editorial team
- o Lead development of an editorial CMS to allow for management of static content within the site

➢ Interviewing/surveying to gain feedback for future functionalities to add to the UX and functionality development for the core platform
➢ Reporting to the CTO on newly completed features/bug fixing as well as planning future tasks for completion

GRAPHIC DESIGNER | SELF EMPLOYED | JANUARY 2009 - PRESENT

➢ Research & image sourcing (sometimes using own photography) for given brief/theme
➢ Creating rough drafts based on initial ideas
- o Flyers
- o Digital Album Artwork
- o 12" Vinyl Sleeves/Labels

➤ Modifying/revising the rough draft based on client feedback
➤ Providing final deliverables for print

Education

BSC – COMPUTER SCIENCE | SEPTEMBER 2011 – JUNE 2014 | BRUNEL UNIVERSITY

➤ Completed a final year project which included analysis of codebases/modification of Eclipse plug-ins to educate first year Computer Science students on best practices of coding, coding conventions & avoiding bad code smells > Participation in group projects which included:
  o Developing an Android app (using Java) which allowed citizens to report local issues in their council/borough
  o Creating a website (using HTML, CSS & JS) which educated first year Computer Science students about placement schemes
➤ Creation of an educational card game (using the XNA framework – C++) which helped students practice conversion of decimal to binary, hexadecimal & two's complement
➤ Partial learning & understanding of Python, project management, usability & networking protocols

3 A*-B A LEVELS (COMPUTING, BUSINESS STUDIES & PHOTOGRAPHY)
8 A-C GCSES (INCLUDING MATHS & ENGLISH)

Technical Skills

· Strong knowledge of HTML (knowledge of BEM naming syntax for classes)
· Strong knowledge of CSS/SCSS
· jQuery/JS
· Handlebars
· Gulp
· Git/Gitflow
· Experience with PHP (using the Laravel framework)
· Experience with SQL
· Knowledge of Photoshop
· Experience with Java & C++

Interests

My main hobby is music production (specializing in Drum & Bass/Jungle). I've been producing for just 7 years and have had songs released on various Drum & Bass record labels. I've also had some of my songs played in clubs worldwide (as well as playing DJ sets in clubs across the UK) & on radio stations like BBC 1Xtra, Kiss FM, Rinse FM & NTS Radio, by a variety of DJs/other producers.
